DETAILED ACTION

Claims 1-6 are pending in this application.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed 5/10/02 and 6/20/02 complies with 37 CFR 1.98(a)(3) and has been placed in the application file, the information referred to therein has been considered.

Claim Rejections - 35 U.S.C. § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Mueller et al(US 5,071,876).

Application/Control Number: 10/089,131

Art Unit: 1621

Mueller et al, column 8, lines 54-65, anticipates the instant claim, when in the instant claims, Y is -NHCO-, n is 1, m is 2, R1 and R2 are hydrogen, t is 1, u is 2, R4 is alkyl, p is 0, q is 2, and R3 is alkyl.

5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by JP-A-4-173775.

JP'775, page 9 of the translation, compound 5, anticipates instant compounds, when, Y is

NHCO n is 2, t is 1, p is 0, q is 3, R3 is alkyl, m is 1, R1 and R2 are hydrogen, u is 0.

Claim Rejections - 35 U.S.C. § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Application/Control Number: 10/089,131

Art Unit: 1621

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 1-2 and 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lau et al(US 5,614,357).

Lau et al, in column 4, compound I, teaches structurally similar compounds as claimed herein. Note that R6 can be phenyl substituted with various groups as claimed herein, also see lines 57-67 in column 4, Z can be hydrogen, R5 and R4 can be hydrogen, X can be halogen, and R3 can be alkyl. The difference between the reference and herein claimed compounds is that the reference has not made any particular compounds as claimed herein.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to obtain compounds within the generic disclosure of the reference, because they are structurally so similar to those claimed herein, and definitions of various substituents extensively overlap that of the instant claims, with the reasonable expectation of achieving a successful recording material, absent evidence to the contrary.

Application/Control Number: 10/089,131 Page 5

Art Unit: 1621

9. Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsuchiya et al(US 4,988,662).

Tsuchiya et al is teaching structurally similar compounds as claimed herein, for the recording material, see column 2, compound (I). Note that Y1 can be OH, X1 can be S, R5 can be phenyl substituted with alkoxy, or hydroxy R1 and R2 can be hydrogen. The difference between the reference and herein claimed compounds is that the reference has not made the specific compounds as disclosed in the instant specification.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to obtain compounds within the generic disclosure of the reference, because they are structurally so similar to those claimed herein, and definitions of various substituents extensively overlap that of the instant claims, with the reasonable expectation of achieving a successful, recording material, absent evidence to the contrary.

No claim is allowed.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to S.Kumar whose telephone number is (703)-308-4519. The examiner can normally be reached on Monday to Thursday from 8:00 AM to 5:30 PM. The examiner can also be reached on alternate.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter, can be reached on (703) 308-4532. The fax phone number for the organization where this application or proceeding is assigned is (703)-308-4556.
